Publié le 25/11/05

HERBIGNAC — « *The XXIth century could be well that of a crime of humanity against life* »

Alain Guillou sends an alarm message and proposes a step forward to find a solution to the climatic Earth heating phenomenon.

<http://www.agencebretagnepresse.com/fetch.php?id=2783> (in french)

FRIGHTENING:

The Antarctica and the North Poles are melting, the Amazon river is drying up and people are already dying around the Mexican Gulf, South and North America

Avalanches killed alpinists in the Himalayan chain in a place where no one could have imagined this happen. The seasons are all upside down on all continents.

The Eternal snow of Ernest Hemingway are vanishing (see <http://www.guilou.com/velo/killdry.htm>)

Nature will be as pitiless as we are while destroying it ! NO ONE CAN EXPECT ANY MERCY

Alain Guillou

Images researcher and press agent Alain Guillou is a photographer of international reputation (he won First Life's Picture of the Year in 1983 in the USA). He worked for magazines like Paris Match, National Geographic, Life Forbes magazine and took thousands photos on all continents...

He is also a photographer of the sea and of Brittany which he likes passionately.

With his recumbent carbon bicycle VK3 by Velokraft, he is preparing to make photographs on the Island of Yeu before following the banks of the Nantes to Brest Canal. This will be followed by a trip all around Brittany from North to West and South, ending up in Nantes ...

This run is just to prepare himself to take course toward North Cape in Norway for a drive around all of Europe and to follow the former line of the Iron Curtain down to the East of Turkey ! ■
